

Breathing in the Sun - Reprise

As far as I go
I can hear the endless cry
The last flame, the final prayer before the
darkness falls
Through out heaven and boundless earth
I will never let you go

God of Love, God of Mercy
Always far and near

O Lord shall I find thee
Breathing in the sun

Come with light, Come with thunder
Never let me go

Come in joy, Come in sorrow
I want you only you

Aging flesh, chant and stress
Star of love, shine in the silent sky for all of
us
Mercy's kiss for all of us
Wounds be the gates to life's stillness
Say what you have to say

New light, of beginning, Breathing in the
sun

Bring in a new world, a new life
Of darkness gone, of darkness yet to come
Of breathing in the sun
Give unto our children and
They unto their children truth

The secret world we share,
The do's and don'ts of blood I owe
Our love suffers death and yet forever lives
When evening comes and memories Light
the rooms inside my heart

When I dream your voice, across the sea of
years
Freedom from the restless tides in me

The breath inside my breath
The light inside the light
Breathing in the sun
